## NEWS COMPILATION

### DECASTELLI.COM

Le savoir-faire et la passion pour le métal caractérisent le projet de cette villa privée dans le nord de l'Italie, parfaite symbiose entre le bâtiment existant et le revêtement contemporain de l'extension. **De Castelli** réalise un bardage en aluminium délabré : une finition artisanale obtenue par un traitement manuel capable de donner un aspect naturel et des effets chromatiques particuliers rappelant le ciment. Le revêtement en aluminium combine esthétique et technologie, répondant aux sollicitations de l'exposition au rayonnement solaire et à l'action des agents atmosphériques.

*Il know-how e la passione per il metallo caratterizzano il progetto per questa villa privata nel Nord Italia, perfetta simbiosi tra edificio esistente e rivestimento contemporaneo dell'innesto. **De Castelli** realizza di un rivestimento in alluminio délabré: finitura artigianale ottenuta mediante una lavorazione manuale in grado di conferire un aspetto naturale e particolari effetti cromatici che richiamano il cemento. Il rivestimento in alluminio, oltre a coniugare estetica e tecnologia, ben si sposa a un ambiente outdoor esposto alla radiazione solare e all'azione degli agenti atmosferici.*

**K**now-how and a real love of metal are the distinctive features of this project for a detached house in northern Italy, a perfect symbiosis of the existing building and a very edgy cladding over the extension. **De Castelli** produces a cladding made of délabré aluminium with a handmade craft finish creating a natural look with special colour effects reminiscent of concrete. The aluminium cladding not only combines good looks and technology, it easily adapts to an outdoor setting exposed to sunlight and atmospheric agents.
